

Job title	<i>Commercial Electrician (Journeyman or Master)</i>
Reports to	<i>Project Manager/Engineer – Energy Engineering Division</i>

Job purpose

Responsible for the installation of our demand control kitchen ventilation (DCKV) product. Duties consist of, but are not limited to, all areas of the installation process including our DCKV product, variable frequency drives, high voltage wiring, low voltage control wiring, and plug and play cabling.

Key responsibilities

- Installation of the DCKV product into commercial kitchen hoods.
- Experience with HVAC, Controls, and VFDs preferred.
- Able to be a self –starter but also work well in a team environment for a fast paced, forward thinking company within the construction industry.
- Comfortable working a variety of shifts, including some night work as required by our customer’s kitchen staff.

Qualifications

- 2-5 years of commercial electrical experience (Journeyman or Master)
- NH or MA master’s license is a plus.
- Mechanical, electrical, and controls knowledge.
- Superior customer service skills.
- Able to demonstrate a high level of integrity and sense of pride in workmanship.
- Excellent written and verbal communication skills.
- Computer skills required (comfortable working with iPads).
- OSHA (Construction Safety & Health) 10 or 30 hour training required.
- Must pass a driving record and background check.
